ENDO-DONTIA

DR.DENTISTE'S dental academy is an academy that focuses on teaching the DOCTOR about ENGINEERING of teeth so that he/she can work like an ARTIST and thus a DENTIST is created.

Our strong focus is on developing skills and knowledge in the different branches of dentistry along with incorporating modern advances in technology into today's clinical practice.

COURSE OBJECTIVE:-

- ψ Enhance knowledge of basic science essential to understand the art of cosmetic dentistry.
- ψ Improve the clinical skills of the dentist with a focus on broad spectrum of modern aesthetic treatment methods.
- ψ This programme is specially designed to improve the skills in endodontics.
- ψ This course focus on a particular system in cleaning and shaping and it also gives a complete knowledge about pulp space and its therapy.

"you are never fully dressed without a smile"

COURSE HIGHLIGHTS

- * Participants will learn to do molar, premolar, canine and incisor root canal in less than 30 minutes.
- * Single sitting root canal will be done.
- * Complete detailed knowledge of use of apex locator and endomotor will be attained.
- * Certificate after successful completion of the programme.
- * Post course assistance 1 year after completion.

LECTURES

- ☒ RATIONALE OF ENDODONTIC TREATMENT

- ☒ Diagnosis and treatment planning
- ☒ Root canal system anatomy and internal variations in configuration.
- ☒ Access opening
- ☒ Anterior, Premolars, Molars
- ☒ SLA- Straight Line Access
- ☒ De-roofing
- ☒ Orifice location
- ☒ Working length determination
- ☒ Apex locators
- ☒ Rationale of cleaning and Shaping
- ☒ Working width- the forgotten dimension
- ☒ Maximum microbial control using irrigants
- ☒ Apical Negative pressure irrigation- Endovac
- ☒ Role of Intracanal medicaments
- ☒ Cleaning and shaping using
- ☒ Manual and Rotary Instruments
- ☒ Three dimensional obturation
- ☒ Single sitting endodontics
- ☒ Recent advances in endodontics

Dr. DeWiste

LIVE DEMONSTRATION

- ψ Rubber dam placement
- ψ Access opening in a molar tooth on a patient
- ψ Working length determination using RVG and Apex locator
- ψ Cleaning and shaping of molar tooth using hand and rotary instruments
- ψ Three dimensional obturation

HANDS ON – ON MODELS AND PATIENTS

- Access opening in extracted natural teeth (minimum of 30 teeth)
- Orifice enlargement
- Working length determination using RVG and Apex locators
- Cleaning and shaping on extracted teeth using hand & rotary system
- Obturation using
- Lateral condensation
- Single cone technique
- Diagnosis.
- Case selection.
- Straight line Access preparation.
- Working length determination – radiographic and apex locator method.
- Irrigation protocol.
- Intra canal medicaments.
- Cleaning and shaping.
- Rotary endodontics- Principles and technique.
- Obturation techniques.
- Post endo restoration.
- Management of flare-ups and shortcomings.
- Master the single sitting Root Canals and learn how to retrieve a broken file from the canal
- Learn to master the perforation of canals

"you are never fully dressed without a smile"

- Participation limited to max 5 doctors only. Confirm your participation at the earliest.
- Modules are headed by an Endodontist only. The availability depends upon the time chosen of the month for course.
- Unlimited patients will be provided by the academy. However the surity is for 10 cases only. If the candidates want to do more patient, then the patient can be arranged at a nominal cost only.
- Weekend classes
- Modules and class timings are flexible.
- Endomotor, apex locator and all instruments will be provided by the academy.
- A certificate for satisfactory completion of course will be provided by the academy.
- One year post course assistance will be provided by the course mentor.
- Fees to be deposited at once before starting the course.
- Course fee include refreshment drinks, tea and lunch.
